# Briefly

Our Strategy to Develop our Competitive Advantage

Our Team
Yohanes Wiguna
Nathan Tang

Briefly

Preface: In this assignment, we aim to develop a strategy for Briefly

This is critical as we work towards our launch in May 2025.

Our Journey Thus Far:

2. Incubation
January 2025

Briefly was accepted into SMU IIE's Incubation Programme , placing us **within the Top 20% of over 180 startups** that applied

BUSINESS INNOVATIONS GENERATOR

1. Conceptualisation
November 2024

Briefly was **conceptualised to solve business professionals' challenges in accessing business insights**: credibility, cost, relevance and time

3. Launch
May 2025

We **aim to launch Briefly in phases**, starting with our website as our Minimum Viable Product, with industry-specific news

Briefly

PREFACE

Background: Briefly is an AI-powered platform that provides credible, relevant and concise business insights in a multi-format personalized way

Insights Platform

Industry-Level Business Insights
- Summarises key news in different industries
- Connects the dots for the user in terms of broad industry trends, and analyses implications

Personalised Business Insights
- Summarises key news based on user's industry, profession and seniority
- Connects the dots for the user by highlighting shifts in user's operating environment, its implications and recommendations

Social Platform

Posts by Key Opinion Leaders
- Allows key opinion leaders to post their latest analysis on Briefly
- This allows them to grow their following and improve their thought leadership

Key Opinion Leader Insights
- Allows users to read key opinion leaders insights on current affairs and broader shifts in industry trends
- Filter key opinion leaders based on credibility and relevance

AI-Powered Platform
AI-Powered Platform
- Harnesses the power of AI to harvest the most relevant news, contextualise it to broader industry trends, analyse implications of the trends and provide recommendations

Multi-Format Options
- Allows key opinion leader to auto-generate text posts, podcasts or videos
- Allows users to consume business insights through text summaries, audiobooks, podcasts or videos

Briefly

BACKGROUND

Background: Briefly aims to help business professionals navigate an increasingly turbulent and noisy world that is still highly interconnected

1. We live in an increasingly turbulent and noisy world that is still highly interconnected

Trade tariffs imposed with no early warning resulting in massive global supply chain and immigration implications

Global wars erupting which threaten the flow of trade, money and people
Small black swan events such as Evergreen halting global supply chains for weeks

2. Market research has shown that business professionals face challenges in navigating this

● Biggest Challenges in Accessing Business Insights (%)

Challenge	Value
Credibility	63
Cost	61
Relevance	54
Time	41
Variety	17

(x-axis: 0, 10, 20, 30, 40, 50, 60, 70)

Background: In sum, we are the solution that business professionals want

Our Product: An Application that Provides Personalised Summaries of Business News and Key Opinion Leader (KOL) Insights

Key Factors	Existing Options	Briefly
Credibility	✗ No Verification Means	✓ Certified KOLs & News Sources
Cost	✗ Multiple Subscriptions Required	✓ Single Affordable Subscription
Relevance	✗ General Business Insights	✓ Personalised Business Insights
Time	✗ Articles of Predetermined Length	✓ On-Demand, Preferred Length

Briefly

BACKGROUND

Background: We have developed the UI for our app, and are currently working to develop the backend

BACKGROUND

Problem: How can we develop a competitive advantage?

This is our most critical problem given our context and operating environment.

Our Desired Outcomes: Growth ⟶ Revenue ⟶ Profitability

Our Context and Operating Environment:

Briefly		Key Opinion Leader Platforms	Traditional News Platforms

VS

- Newly Established
- Limited Resources

- Well Established
- Significant Resources

- Well Established
- Significant Resources

Common to All: Rapid advancements in Artificial Intelligence and Machine Learning

PROBLEM STATEMENT

Briefly

#1: We will adopt a focused differentiation strategy in the short run

This is based on our internal analysis using the SWOT framework.

	Cost	Differentiation
Broad	**Cost Leadership** ❌ **Small User Base** - Difficult to Achieve Economies of Scale Required for Cost Leadership	**Differentiation** ❌ **High Technological Requirements** - Difficult to Develop Engine to Generate the Best Insights Across Variety of Topics
Narrow	**Focused Cost Leadership** ❌ **High Supplier Power** - Low Power Over News and Technology Suppliers Necessary to Reduce Costs	**Focused Differentiation** ✔️ **Manageable Near-Term Requirements** - Focus on Developing Engine that can Generate the Best Insights in one Domain

FOCUSED DIFFERENTIATION

Briefly

#1: In particular, we will focus on ESG insights

We will be the first mover in this area within our strategic group.

Key Opinion Leader Platforms

FOCUSED DIFFERENTIATION

Briefly
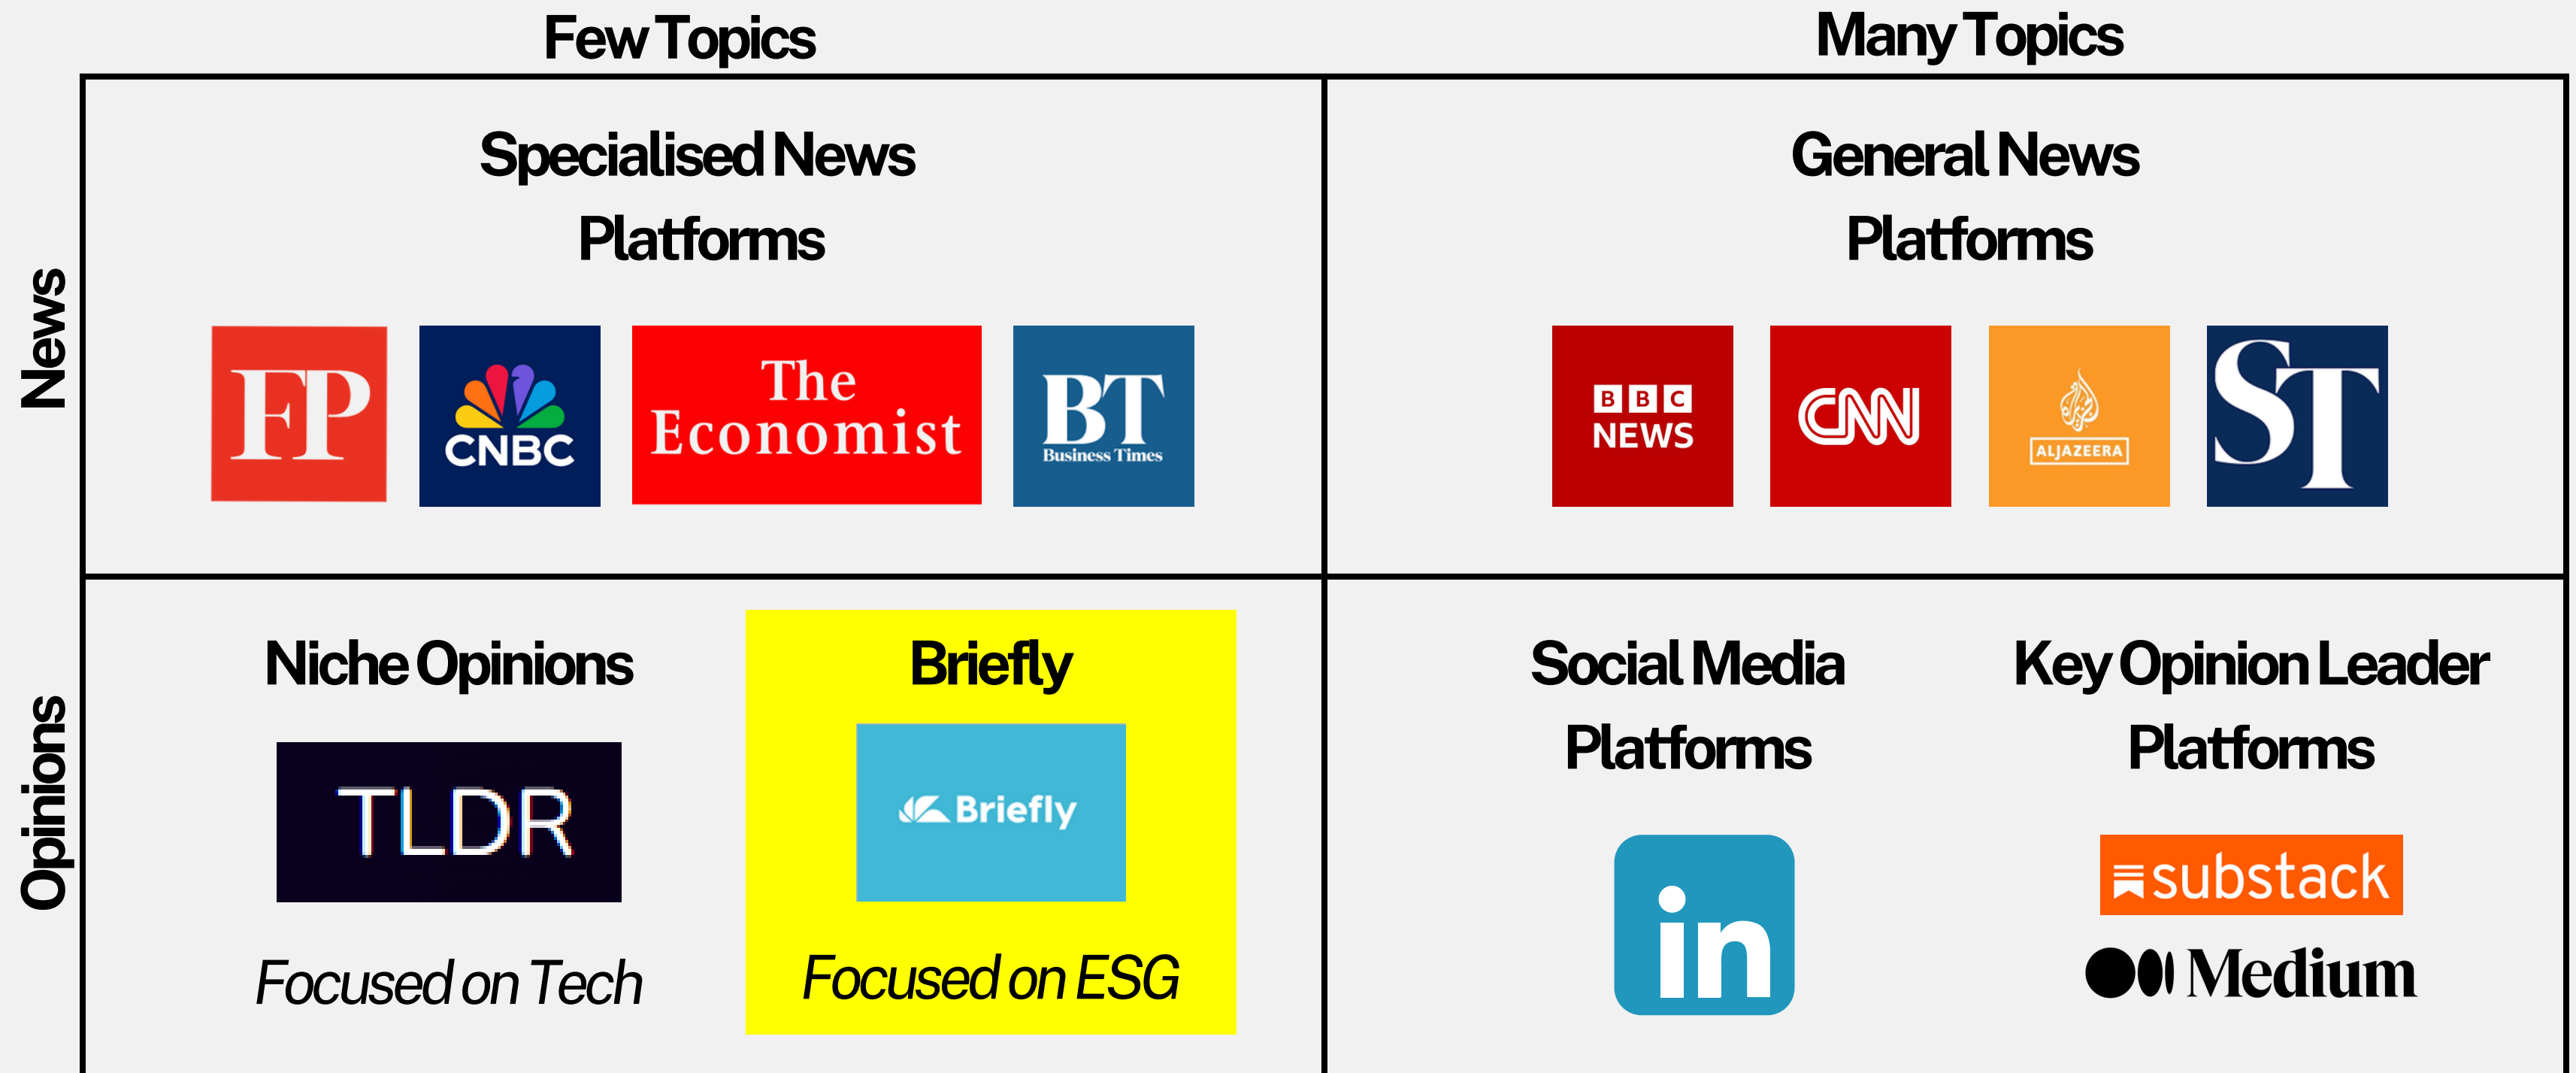

#1: This is also because ESG is a fast growing space with high information asymmetry for business professionals

ESG mandated assets could make up half of all managed assets in the US...

ESG-mandated ■ non-ESG-mandated

Professionally managed assets in the United States (US$ trillion)

Year	ESG-mandated	non-ESG-mandated	Total
2012	$3.7	$29.6	$33.3
2014	$6.6	$30.2	$36.8
2016	$8.7	$31.6	$40.3
2018	$12.0	$34.6	$46.6
2025	$34.5	$34.5	$69.0

Share of ESG assets in overall professionally managed assets in the United States

11%   18%   22%   26%   50%

Deloitte Insights | deloitte.com/insights

And yet, business professionals struggle with understanding regulations.

|	
Balancing ESG with growth targets	40%
Lack of reporting standards and regulations/complexity	37%
Lack of attention or support from senior leadership	33%
Volatility of regulatory requirements	31%
Difficulty quantifying the potential ROI	31%
Lack of funding	30%
Lack of time	29%
Corporate silos	24%
Q: Which of the following do you feel are the biggest barriers preventing your company from progressing on environmental, social, and governance issues? Executives (n=1,257)
Source: PwC Consumer Intelligence Series June 2, 2021

FOCUSED DIFFERENTIATION

Briefly

#2: As a small start-up, value innovation will also allow us to manage costs while differentiating ourselves

|	Strategy	Focus Area	Evidence
Eliminate	**Don't create content for the sake of creating content**	• "Junk" News and Insights	• 63% of survey respondents said that credibility is one of the biggest challenges in accessing business insights
Reduce		• "Lengthiness" of News and Insights	• 41% of survey respondents said that time is one of the biggest challenges in accessing business insights
Raise	**Only create content that is credible and relevant**	• "Credibility" of News and Insights	• 63% of survey respondents said that credibility is one of the biggest challenges in accessing business insights
Create		• "Personalisation" of News and Insights	• 54% of survey respondents said that relevance is one of the biggest challenges in accessing business insights

VALUE INNOVATION

#2: For "Raise" and "Create", we will focus on developing our exclusive key opinion leader content and proprietary AI
Exclusive Key Opinion Leader Content
"Credibility" of News and Insights

- Develop features to increase posting rates of key opinion leaders (e.g.., podcast or video generation).
- Enroll and invest in exclusive key opinion leaders based on the appropriate target audience.
Proprietary AI Workflows and Frameworks
"Personalisation" of News and Insights

- Workflow based on proprietary insights frameworks.
- Retrieval Augmented Generation based on proprietary database.
- Fine-tuned model based on most advanced AI tools.

VALUE INNOVATION

Briefly

#2: Importantly, this will also reduce our vulnerabilities from external threats based on Porter's Five Forces

Threats	Risk	Key Threats
Entrants	High	New entrants can easily copy our idea, making use of openly available news and opinion sources and generative AI tools.
Suppliers	Moderate	We are dependent on news sites and key opinion leaders who are relatively established and can bar us from using their content; however, there are many options
Customers	High	Customers can easily switch at low costs, with little incentive to continue to use our platform, with subscriptions on a monthly basis at best.
Substitutes	High	Beyond existing competitiors, generative AI tools are advancing rapidly, and could be a viable substitute for what our platform does.
Competitors	High	Our competitors are well established, and could actively shift their positioning or lower their prices to squeeze us out of the market.

- Exclusive key opinion leader content reduces threats from **suppliers and customers** as we are less dependent on established news websites and customers will have more incentive to stay on our platform for the content
- Proprietary AI will reduce threats from **entrants, competitors and substitutes** as it is not easily copied or replaced

VALUE INNOVATION

Briefly

#3: We will hire, train and partner based on VRIN competencies

This will allow us to build up our VRIN core competencies.

Competencies Required	Importance of Competency	Current Competency	Approach
Business Management (i.e., managing the day to day business manning, operations and finances)	Valuable	High	**Execute** - internally manage given that we have a high level of competency in doing this and there is a low ROI of outsourcing
Full Stack Web Development (i.e., development of our application and website)	Valuable	Low	**Outsource** - hire interns given that this competency is easily available and is imitable
AI/ML Development (i.e., development of proprietary AI workflows and frameworks)	Valuable, Rare, Inimitable, Non-Substitutable	Low	**Train** - this will be have to be our core competency that deters entrants and allows us to deliver value to our consumers
Key Opinion Leader Engagement (i.e., onboarding key opinion leaders to post on Briefly)	Valuable, Rare, Inimitable, Non-Substitutable	Moderate	**Partner** - leverage partners for a multiplier effect in onboarding key opinion leaders and building an ecosystem

CORE COMPETENCIES

Briefly

Conclusion: Our Strategy Statement

Key Elements of Our Strategy

Where do we compete?
The business insights market, with a focus on ESG insights in the near term.

What unique value do we bring to customers?
Credible, relevant and concise business insights in a multi-format, personalised way.

What resources and capabilities do we utilize?
We will develop our core competencies in AI and ML to make sure that we can generate the best insights for our consumers.

How do we sustain our value?
We will develop proprietary AI workflows, frameworks and databases while securing exclusive expert-driven content

Our Strategy Statement

Briefly competes in the business insights market, focusing on niche markets.
We deliver credible, relevant, and concise business insights through AI-powered curation and multi-format personalization, ensuring professionals receive the most relevant and actionable information.
*Our core strength lies in AI/ML capabilities to generate the best insights.*
To sustain our competitive advantage, we will develop our proprietary AI, and expert-driven content partnerships.

STRATEGY

Briefly

More than just a news app

Let's personalize news and KOL Insights. Join us in this revolution!
News stays awake.

External Analysis - PESTEL

	Potential Challenges	Mitigation Strategy
Political	• AI & Data Privacy Regulations differ across countries • Content Licensing Rules	• Full compliance to regulations & transparency • Partner with news providers (including legal binding contract)
Economic	• Minimum consumer purchase power in developing countries	• Freemium business model, earn revenue from data selling and advertisement.
Sociocultural	• Limitation of English in non-english speaking countries • Trust & misinformation	• Localization to local language (in the far future) • Verified sources and content/KOLs curation
Technological	• AI model competition • Hallucinations (AI Bias)	• Continuous improvement with rolling release • AI engine trainingHuman verifications
Ecological	• AI energy consumption	• Find out solution to sustainable AI practices (e.g. Carbon neutral cloud providers)
Legal	• Copyright risks • AI ethics & liability	• Secure content licensing deals • Create internal AI ethics policies to avoid bias, ensure transparency and protect data
